

Ejei-Okeke Emmanuel Chijioke

Product Leader & Full-Stack Engineer: Fintech, Payments & Digital Products

Lagos, Nigeria (open to remote / relocation) · +234 903 223 4467 · ejeiokekeemmanuel@gmail.com
linkedin.com/in/ejei-okeke-emmanuel · ejeiokekeemmanuel.vercel.app · github.com/therealemino

SUMMARY

Product lead and full-stack engineer with 5+ years spanning hands-on frontend and full-stack development and product management across fintech, travel, and e-commerce. Built and shipped production systems end to end in React, Next.js, Vue, Nuxt, Node.js and TypeScript before and alongside taking on product ownership of PSSP payment infrastructure, merchant dashboards, credit systems, and multi-platform digital experiences. Pairs technical fluency (component architecture, API integration, performance optimization, testing) with an MBA in Fintech & Blockchain (4.00 CGPA, Nexford University) to move between writing code, leading engineering teams, and owning business strategy. Track record: a 625% increase in user engagement (~4,000 to 25,000+ users), an 88% reduction in page load time, transaction success rates lifted from the mid-to-high 70s to 94-98%, and multiple products shipped from concept to production as lead or sole developer.

CORE COMPETENCIES

- Product & Strategy:** Product strategy and roadmapping, backlog prioritization and MVP scoping, user and market research, data-informed decision making, cost and unit-economics analysis, multi-platform portfolio management.
- Payments & Fintech:** Payments and PSSP infrastructure, pay-ins/payouts and settlement, payment-method optimization, merchant onboarding and compliance, regulatory compliance in a CBN-licensed environment.
- Delivery & Leadership:** Agile/Scrum leadership, sprint planning and retrospectives, cross-functional team leadership (engineering, design, content, compliance, commercial), stakeholder management, risk management and milestone tracking.
- Frontend Engineering:** React.js, Next.js, Vue.js, Nuxt.js, React Native, TypeScript, JavaScript (ES6+), HTML5, CSS3 (SASS, Tailwind CSS), responsive and mobile-first design, progressive web apps, server-side rendering, cross-browser compatibility, component-based architecture, single-page applications.
- State Management & UI:** Redux, Vuex, Pinia, Zustand, Ant Design, shadcn/ui, Chakra UI, Bootstrap.
- Backend & Data:** Node.js, Express, Python (working proficiency), PostgreSQL, MongoDB, SQL, Prisma, REST and GraphQL APIs, Firebase.
- Testing & Quality:** Jest, React Testing Library, Vitest, manual/API/regression testing, Postman.
- DevOps & Version Control:** Git, CI/CD pipelines, Vercel.
- Tools:** JIRA, Trello, ClickUp, GitHub Projects, Figma, Notion, Confluence, Slack, Microsoft Teams, Google Workspace.

PROFESSIONAL EXPERIENCE

Tytron Group (Tytron & Company Management Limited)

Jan 2026 - Present

Product Manager, Digital Projects

Lagos, Nigeria (remote) · Strategy, management and marketing consultancy · Contract

- Lead product development for Kulturee, a global travel and cultural experience platform, owning scope, roadmap, and delivery framework from the ground up.
- Led the Kulturee MVP through to delivery after two prior attempts had stalled, taking ownership of scope definition, sprint planning, and cross-functional execution across design, development, content, and commercial teams.
- Identified that Discovery's dependence on live Google Places API calls was not economically sustainable at scale, with costs projected to reach thousands of dollars monthly as the user base grew into the tens of thousands, a structure the product's free tier and subscription margins could not support.
- Designed and drove the mitigation strategy: a proprietary places database populated city by city (target of 200 curated places per city) by a trained curation team, reducing long-term dependency on live Google Places calls. Database scaled from roughly 2,000 to a projected 40,000+ places within one month of the initiative starting.
- Defined a tiered access model aligned to monetization: free-tier users draw primarily from the proprietary database, while Pro-tier subscribers retain access to both the database and live Google Places queries for advanced search, protecting subscription unit economics while preserving product quality.
- Track progress and manage risk in ClickUp, with stakeholder visibility maintained through Notion and Slack; report performance against KPIs to Tytron's leadership team.
- Scope also includes One-Stop-Medic, a unified digital healthcare marketplace (not yet started as of August 2026).

Echezona Digital Gateway Ltd

Jul 2024 - Present

Product Lead & Senior Frontend Engineer

Lagos, Nigeria · CBN-licensed PSSP / payments fintech

- Promoted from Frontend Engineer (Jul 2024) to Product Lead & Senior Frontend Engineer (Jan 2025), taking on end-to-end product strategy and roadmap ownership for a CBN-licensed Payment Solution Service Provider (PSSP).
- Led delivery of core payment products across card, USSD, and bank transfer (virtual account) rails, plus merchant and admin dashboards, POS terminal features, and dynamic storefronts.
- Designed and built retry-aware multi-provider routing: when a customer retries a failed payment, the new attempt goes through an alternative card processor or a second partner bank for virtual accounts, all under one transaction reference and one final webhook.
- Shipped an instant settlements feature and a terminal-level settlement-account feature letting merchants view balances and transaction history directly on POS hardware, cutting reconciliation friction.
- These initiatives improved transaction success rates from the mid-to-high 70s to 94-98%, accounting for abandoned transactions.

- Authored Echezona's full public API documentation (docs.echezona.com).
- Direct cross-functional squads across engineering, design, and marketing; run sprint planning, backlog grooming, and retrospectives to sustain a high-velocity delivery cycle.
- Mentor designers on frontend constraints, design consistency, and component-based UI approaches; led frontend architecture and reusable UI components across services.
- Architected and built the frontend in React/Next.js and TypeScript, implementing reusable component libraries and state management patterns that reduced duplicate work across merchant dashboard, checkout, and POS-terminal surfaces.

eliEls

Aug 2024 – Present

Technical Project Manager / Product Lead

Lagos, Nigeria · Art and fashion institute · Freelance

- Directed end-to-end development of the brand's digital platform, translating brand vision into a high-fidelity e-commerce experience and immersive digital gallery.
- Partnered closely with the brand strategist to co-define digital brand identity and visual storytelling.
- Orchestrated the project submission and digital presentation that secured two consecutive invitations to Milan Fashion Week, validating the brand's international appeal.
- Led a cross-functional team of developers to build and maintain a high-performance, mobile-first e-commerce engine.

Pennee Technologies Ltd (Yana)

Oct 2021 – Jun 2024

Frontend Engineer (Product)

Lagos, Nigeria · B2B credit and cash-flow fintech

- Partnered with product, design, and engineering to ship payment widgets, guarantor and credit-application flows, dashboards, and websites for SME credit financing.
- Drove a 625% increase in user engagement and growth in the user base from approximately 4,000 to 25,000+ through iterative, metrics-informed product and UX improvements.
- Built secure, scalable frontend architecture supporting an expanding merchant and borrower base.
- Partnered with support and engineering to resolve customer-facing bugs and improve error handling, reducing repetitive support tickets by 30%.
- Ran functional, regression, and API testing (Postman) to catch defects before production.
- Built and maintained the frontend stack in React and TypeScript, integrating REST APIs for real-time credit-application status, payment processing, and guarantor workflows.

Loiz Tours & Travels Ltd

Nov 2022 – Aug 2024

Junior Product Owner / Frontend Developer (part-time)

Lagos, Nigeria · Travel

- Frontend Developer (Nov 2022 – Aug 2024): translated mockups and wireframes into interactive, intuitive web applications with UX/UI designers, maintaining design consistency; optimized website performance for an 88% reduction in load time.
- Junior Product Owner (Jul 2024 – Aug 2024): translated stakeholder needs into clear, actionable product requirements; guided developers through Agile delivery (stand-ups, sprint planning, reviews, retrospectives).

Confidential Clients

Jan 2024 – Present

Independent QA & Integration Consultant

Remote · Enterprise digital products (under NDA)

- Design and execute manual and automated testing strategies (API, functional, regression) for enterprise digital products.
- Define quality benchmarks with external engineering teams, surfacing critical bugs and performance bottlenecks before deployment.

Nexbuy District

Jan 2020 – Apr 2022

Frontend Developer / Instructor

Enugu, Nigeria · E-commerce startup

- Shipped core pages for the e-commerce platform (v2) with a mobile-first strategy: landing, authentication, and other site pages from concept through deployment.
- Improved app architecture and performance, contributing to a 55% increase in active users.
- Developed and delivered the HTML/CSS/JS curriculum at Nexlearn, Nexbuy's tech education subsidiary; mentored aspiring developers.
- Head of NEXSCROW (Jan 2021 – Apr 2022): regulated security and payment of escrow funds between transacting parties.
- Brand Ambassador (Aug 2019 – Jan 2021): day-to-day coordination and public-facing communication; liaised with web-app clients. Three-time Staff of the Month (Jul 2020, Feb 2021, Nov 2021).

Coriftech Solutions Ltd

Oct 2020 – Jan 2021

Web Development Instructor (volunteer / intern)

Delta, Nigeria · IT services

- Provided tailored tutoring in frontend web development (HTML, CSS, JavaScript, and frameworks), adapting the teaching approach to individual learning styles.

West African Oilfield Services

Jun 2019 – Dec 2019

Student Intern (Engineering)

Port Harcourt, Nigeria · Oil and gas field services

- Collaborated with the draughtsman to create precise 2D and 3D models in AutoCAD, including the refurbishment of a single point mooring buoy.

- Supported the Drawing Engineer in drafting and editing accurate as-built plans.

VENTURES

Veem	Co-founder & CEO
A consent-first identity verification and KYC orchestration layer for Nigeria, aggregating BVN and NIN checks and biometric verification into a single confidence-scored identity signal for merchants. I lead strategy and product direction. useveem.com	
Rimoswap	Co-founder, previously CTO
Rimoswap makes stablecoin transfers and crypto-to-fiat flows simpler for everyday users across Africa. As CTO until March 2026, I led engineering across trading, wallets, P2P and cross-border payments, and built Rimoswap Tags: send to a handle, not a wallet address. I now advise on direction. rimoswap.com	
Emino Digital Technologies	Founder
A selective software development and technology advisory studio (CAC-registered), taking on a limited number of engagements per quarter. Client work spans fintech, hospitality, and consumer platforms. eminotechnologies.com	

SELECTED PROJECTS

Kulturee (2026 – present): Global travel and cultural experience platform under Tytron Group; owned scope, roadmap, and delivery.

Echezona Platform (2024 – present): Merchant dashboards, checkout, multi-provider payment routing, and embedded payment widgets.

The Hendon House (2025): Full-stack boutique hospitality platform: website, reservations, and back-office, built from scratch.

Kontrol by Yana (2025): Frontend for a consumer credit app: income tracking, credit repair, loan access, personalized insights.

eliEls Digital Platform (2024 – present): Immersive digital gallery and e-commerce; two consecutive Milan Fashion Week invitations.

Yana Platform (2021 – 2024): Company website (2023) plus guarantor and credit-application forms and payment widgets for SME credit financing.

Loiztravels Website (2024): Conceptualized, developed, and launched Loiz Tours & Travels' e-commerce travel website.

Book Everything NG (2024): An online e-commerce bookstore.

EDUCATION

MBA, Fintech & Blockchain specialization: Nexford University, Washington, D.C., USA · Apr 2025 – Jul 2026 · CGPA 4.00/4.00

B.Eng, Electronics Engineering: University of Nigeria, Nsukka · 2015 – 2021 · Second Class Honours (Upper Division), 4.07/5

SSCE / WASSCE: Marble Hill School, Asaba, Delta State · 2009 – 2015

CERTIFICATIONS & TRAINING

Becoming a Product Manager: A Complete Guide (LinkedIn, 2026) · AI Agents for Product Leaders (LinkedIn, 2026) · ISO 27001:2022 / ISO 22301:2019 Implementer Training (Numeric Consulting & Solutions Ltd, 2025) · Advanced Business Foundations (Nexford University, 2025) · Foundations of Project Management (Google, 2024) · How to Build Digital Products (Product School, 2020) · Creative Problem Solving (University of Minnesota / Coursera, 2020) · HTML, CSS and JavaScript for Web Developers (Johns Hopkins University / Coursera, 2020) · Python for Everybody Specialization (University of Michigan / Coursera, 2020) · AI for Everyone (DeepLearning.AI / Coursera, 2020) · Fundamentals of Digital Marketing (Google Digital Skills for Africa, 2020).

VOLUNTEERING

Sustainobles, Community Member, Lagos, Nigeria · Oct 2023 – Present · Non-profit organization. **Loiz Tours & Travels Ltd**, Frontend Developer (volunteer), Lagos, Nigeria · Jul 2021 – Nov 2021; preceded the paid part-time engagement above.
